DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as

defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Objections

1. Claims 7 and 11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim can depend for a multi-depend claim. See MPEP § 608.01(n). Accordingly, the claims 7 and 11 have not been further treated on the merits.

In claim 2, the following phrases lack antecedent basis: "the first hinging point" (line 3), "the outside edge" (line 7).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1 and 10 are rejected under 35 U.S.C. 102(a) as being anticipated by Fujieda et al, US 2002/0070910.

4. Fujieda teaches a display device comprising housing 100 having a display 120 at least largely rolled up around a shaft 150. The display is

moveable between a first position seen figure 1 and a second position 2, wherein in the second position the display is visible. The display device is provided with a foldable arm 130 which is foldable around a first hinging point and can be folded up along the shaft when the display is in the first position.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fujeda in view of Failla, US 5128662.

7. Failla teaches a housing 900 having a display 810 and 923 at least largely rolled up around a shaft 850 and 950. The display is moveable between a first position seen figure 47 and 50, respectively and a second position seen in figure 46 and 49, wherein in the second position the display is visible. The display device is provided with a telescoping arm 902 and 846 respectively.

8. The display 810 is sub-divided into a number of segments 812-817. In view of the teaches of Failla, it would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the flexible rollable display taught by Fuijeda with the segmented display as taught by Failla to produce a more ridge display.

Allowable Subject Matter

9. Claims 2-6, 9, and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 6498597 and 6229514 are cited to show display with retractable webs.
